DETAILED ACTION

Response to Amendment

1. The amendment filed on March 24, 2005 has been entered.

Election/Restrictions

2. Applicants' election with traverse of species M (Figure 14) in the reply filed on March 24, 2005 is acknowledged. The traversal is on the grounds that the application would be most efficiently examined if all species were searched and examined at one time. This is not found persuasive because this case contains a large number (13) of species. Furthermore, there are significant differences between each of the species. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 40-44 are rejected under 35 U.S.C. 102(b) as being anticipated by any one of U.S. Patent Nos. 2,505,907 (Meston), 5,125,936 (Johansson), 5,254,155 (Mensi), or 6,294,003 (Ray). Each one of Meston (note ref. 20, 23, 30, Figs. 1-3, col. 3, line 25 to col. 4, line 42), Johansson

Art Unit: 1724

(note ref. characters 10, 10', 11, 11', 12, 12', Figs. 2, 3, col. 1, line 5 to col. 2, line 20), Mensi (note ref. num. 26, 28, 38, Fig. 5, col. 3, line 13 to col. 4, line 18) and Ray (note ref. num. 60, 70, 92, Fig. 3, col. 3, lines 28-33) shows a corona discharge electrode assembly having a collector electrode spaced by a gap from a conductive drum having a plurality of conductive spikes extending radially from the drum to provide corona discharge tips as claimed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. These references have been cited as art of interest to show other electrode assemblies.
